March 4, 2024 – March 8, 2024
8:00 AM-5:00 PM

Choctaw Casino & Resort-Durant
4216 U.S. 69
Durant, OK 74701

AGENDA

MARCH 4, 2024

AWR 232 Mass Fatalities

8:00 AM-5:00 PM CT

Room Location-TBD

This 8-hour awareness-level, instructor-led course is designed to prepare rural first responders and officials with the basic knowledge, skills and abilities to manage a mass fatality incident impacting their jurisdiction. Target audience includes first responders, coroners/medical examiners, public health officials, and others with responsibilities during a mass fatality incident. Issues addressed include establishing roles and responsibilities, assets management, remains processing and identification, diversity issues and development of a mass fatality plan that affect the construct of a mass fatality response.

Registration is required through the RDPC website

<https://ruraltraining.org/course/AWR-232/?scheduled=true&id=10126>

MGT 403 Underserved Population

8:00 AM-5:00 PM CT

Room Location-TBD

MGT 403 is an 8-hour, DHS/FEMA-certified, tuition-free, management-level course. This course helps ensure the safety of underserved populations during a crisis event by increasing knowledge among community emergency planners in the area of preparedness. It encourages outreach to the whole community so that everyone considers what these individuals may require in terms of personalized care, transportation, shelter, and medical assistance before the crisis occurs. This course focuses on the preparedness phase of emergency management.

Registration is required through the RDPC website

<https://ruraltraining.org/course/MGT-403/?scheduled=true&id=10125>

Basic Communications Training/Exercise

8:00 AM-5:00 PM CT

Room Location-TBD

This one-day class is a combination of three popular OKOHS Communications Unit classes – Radio 100 for Beginners Course – Basics of public-safety radios, Radio 101 for Responders Course – Basics of public safety radio systems and interoperability in Oklahoma and a Communications Exercise (COMEX) to familiarize participants with interoperability and cache radios. This class is beneficial to all regardless of your level of experience with radios. Experienced radio users will benefit by learning some basics they either never were taught, forgot, or never thought about and by learning about best practices that can help break bad habits noted to impact life safety. Experienced interoperability practitioners will benefit by obtaining the latest updates on interoperability operations, which will improve their ability to work with outside agencies to ensure an efficient response.

G/L 318 Local Mitigation Planning Workshop

8:00 AM-5:00 PM CT

Room Location-TBD

This course is designed to guide local communities through the steps needed to produce, maintain, implement, and update a local hazard mitigation plan that not only meet FEMA's requirements, but also are effective tools for community risk reduction.

Drone/UAV Part 107 Test-Prep Class

8:00 AM-5:00 PM CT

Room Location-TBD

This class is designed to help you prepare for the test for "Part 107" of the sUAS Rule. Part 107 allows commercial drone use without a Section 333 exemption and a manned aircraft pilots license. If you have or plan to use drones/UAVs as part of your emergency management program or you have to address others using drones/UAVs during an incident or event, then this is the class for you.

New Emergency Manager Orientation (NEMO)

8:00 AM-5:00 PM CT

Room Location-TBD

This course is designed to introduce basic Emergency Management Principles and Theories to new Emergency Managers, as well as to Emergency Managers with limited to extended years of service. The course will focus on all Four Phases of Emergency Management with an emphasis on managing expectations, program

assessment and development, as well as planning processes. This course is a combination of lecture, group activities and some basic practical application of material presented in each session.

MGT-481 Disaster Recovery: A Strategic Overview of the Public Assistance Process

8:00 AM-12:00 PM CT

Room Location-TBD

The Disaster Recovery for Senior Officials course provides a strategic overview of the FEMA Public Assistance Process that is essential to disaster recovery for local communities. The FEMA Public Assistance Process provides funding for local governments and eligible Private Non-Profit organizations to conduct effective long-term recovery. Unfortunately, many jurisdictions do not have a good understanding of this process and thereby fail to obtain, and retain, all the recovery revenue the community is eligible for. This course will provide senior leaders and staff planners with the key elements, milestones, and pitfalls to avoid when guiding a local jurisdictions recovery plans and operations.

Registration is required through the TEEX website:

<https://my.teex.org/TeexPortal/Default.aspx?MO=mCourseCatalog&D=EU&C=MGT481&S=33>

First Responder Mental Health

1:00 PM-5:00 PM CT

Room Location-TBD

This course is delivered by the new Oklahoma First Responder Wellness Division of DPS and is CLEET approved for Mental Health hours. This foundational class covers a variety of first responder mental wellness topics including “staying human”, the cumulative effects of high-stress incidents/events, and healthy coping skills. This class also provides an overview of the services provided to first responders by the First Responder Wellness Division.

MGT-482 Disaster Recovery Public Assistance Programs, An Introduction

1:00 PM-5:00 PM CT

Room Location-TBD

The course will provide an introduction to FEMA’s Public Assistance Programs to help local jurisdictions better understand recovery and improve preparedness for the next disaster. Front line jurisdiction leaders and staff members will learn information to better assist their communities and eligible Private Non-Profit partners to prepare for and recover from disasters. Instructors will facilitate an

understanding of how to identify and navigate disaster recovery resources by guiding students through the FEMA Public Assistance Process, providing best practices while avoiding major pitfalls. Many local jurisdictions lack a robust understanding of these processes and thereby fail to obtain, and retain, all the recovery revenue the community is eligible for. This course helps prepare communities to maximize recovery resources in a compliant manner thereby ensuring effective long-term recovery from disaster.

Registration is required through the TEEEX website

MARCH 5, 2024

G/L 318 Local Mitigation Planning Workshop

8:00 AM-5:00 PM CT

Room Location-TBD

This course is designed to guide local communities through the steps needed to produce, maintain, implement, and update a local hazard mitigation plan that not only meet FEMA's requirements, but also are effective tools for community risk reduction.

New Emergency Manager Orientation (NEMO)

8:00 AM-5:00 PM CT

Room Location-TBD

This course is designed to introduce basic Emergency Management Principles and Theories to new Emergency Managers, as well as to Emergency Managers with limited to extended years of service. The course will focus on all Four Phases of Emergency Management with an emphasis on managing expectations, program assessment and development, as well as planning processes. This course is a combination of lecture, group activities and some basic practical application of material presented in each session.

AWR 209 Media

8:00 AM-5:00 PM CT

Room Location-TBD

AWR 209 is a DHS/FEMA-certified, 8-hour, tuition-free course designed to provide rural first responders with the skills and knowledge to quickly adopt the role of public information officer (PIO) if/when needed and to communicate with the public through the media. Many rural first responder organizations do not have a full or part-time PIO on staff. Therefore, in the event that a first responder is thrust into the role of PIO, whether it be roadside at the scene of an emergency or detailing

directions to the public in a crisis situation, it is important to understand how the media works and how to work with the available media outlets.

Registration is required through the RDPC website

<https://ruraltraining.org/course/AWR-209/?scheduled=true&id=10123>

G-272 Warning Coordination

8:00 AM-5:00 PM CT

Room Location-TBD

This course is the latest in the hazardous weather series of courses produced in partnership with the National Weather Service (NWS). Every year, the United States experiences more severe weather than any other country in the world. In order to reduce deaths, injuries, and property losses, emergency managers must work closely with the NWS and the news media to provide effective warnings that can be received and understood by people at risk. This course is intended to help facilitate that process. Course topics include: The Social Dimensions of Warning Response; Developing Effective Warning Messages; Developing an Effective Community Warning Process; and Working with the News Media to Create a Weather Warning Partnership. In addition to lecture and discussion, the course includes case studies, exercises, and an opportunity for interaction with representatives of the local news media.

Drone/UAV Part 107 Test-Prep Class

8:00 AM-5:00 PM CT

Room Location-TBD

This class is designed to help you prepare for the test for "Part 107" of the sUAS Rule. Part 107 allows commercial drone use without a Section 333 exemption and a manned aircraft pilots license. If you have or plan to use drones/UAVs as part of your emergency management program or you have to address others using drones/UAVs during an incident or event, then this is the class for you.

MGT-482 Disaster Recovery Public Assistance Programs, An Introduction

8:00 AM-5:00 PM CT

Room Location-TBD

The course will provide an introduction to FEMA's Public Assistance Programs to help local jurisdictions better understand recovery and improve preparedness for the next disaster. Front line jurisdiction leaders and staff members will learn information to better assist their communities and eligible Private Non-Profit partners to prepare for and recover from disasters. Instructors will facilitate an understanding of how to identify and navigate disaster recovery resources by

guiding students through the FEMA Public Assistance Process, providing best practices while avoiding major pitfalls. Many local jurisdictions lack a robust understanding of these processes and thereby fail to obtain, and retain, all the recovery revenue the community is eligible for. This course helps prepare communities to maximize recovery resources in a compliant manner thereby ensuring effective long-term recovery from disaster.

Project Management

8:00 AM-5:00 PM CT

Room Location-TBD

Project Management for Emergency Managers – An introduction to project management and how it relates to the principles and doctrine of emergency management. Comparing the similarities and how we as EMs apply it.

G-191 EOC/ICS Interface

8:00 AM-5:00 PM CT

Room Location-TBD

The goal of this professional development course, G-191 Emergency Operations Center/Incident Command System Interface, is to enable the students to develop an effective interface between the Incident Command/Unified Command and the Emergency Operations Center by applying National Incident Management System principles.

Prerequisites for Course: Prior to enrolling in E/L/G 0191, students must complete:

- IS-0100 An Introduction to the Incident Command System, ICS 100
- IS-0700 An Introduction to the National Incident Management System
- IS-0800 National Response Framework (NRF), An Introduction
- IS-0200 Basic Incident Command System for Initial Response, ICS 200 or
- IS-2200 Basic Emergency Operations Center Functions

OK-FIRST Refresher

9:00 AM-5:00 PM CT

Room Location-TBD

The purpose of the OK-First Re-certification class is to provide certified OK-First participants with continuing education opportunities. Unlike the OK-First Certification and Assistants classes, training content in Re-certification classes change from year to year and can include topics such as: training on new

tools/websites, re-visiting fundamental topics, training on new weather data/radar products, applying concepts to recent weather events, and more. Prerequisites for Course: Currently OK-FIRST Certified.

Registration is required through the OK-FIRST website
